Mt St John’s Catholic Primary School is a Parish School located on the Dorrigo Plateau. We currently have four classes serving the learning needs of students from Kindergarten to Year 6. We aim to provide opportunities for students to build on their faith experiences. It is through these experiences that we Learn, Grow and Celebrate together.

In 2016, we are engaging with Extending Mathematical Understanding (EMU). EMU is grounded in current educational research. It will assist us in implementing highly effective environments for the learning of Mathematics. Initially we have assessed each student within the school in the domains of Counting, Place Value, Addition & Subtraction and Multiplication & Division. Our next step on the journey is providing students with effective learning experiences that can be customised to children’s individual learning.

In 2016, we are also continuing to strive for excellence in student learning. The main approach to achieving this has been through the ongoing work undertaken in our Professional Learning Team (PLT). Each week our staff gather to engage as a PLT. We draw on the collaborative power of our team to work towards promoting high expectations for all students in our school.

I invite you to be part of our vibrant community. Parents and carers are most welcome within our school to support our students as they Learn, Grow and Celebrate.

Warm regards,

Nathan Trezise
Principal
